PROFILE

Frontend Developer with 1 year of experience in HTML, CSS, JavaScript, React.js, PostgreSQL, and RESTful APIs. Skilled in developing scalable and high-performance web applications while ensuring responsive, user-friendly designs. Passionate about writing clean, maintainable code that follows industry best practices and standards. Strong understanding of UI/UX principles and a keen eye for detail to create engaging user experiences. Dedicated to continuous learning, quickly adapting to new technologies, and staying up to date with the latest advancements in web development.

WORK EXPERIENCE

Frontend Developer | August 2023 - November 2024
Wellspring Systems Pvt Ltd, Chennai

PROJECT

- Cyberblitz is a cybersecurity tool specializing in continuous security validation and breach and attack simulation. It provides reports on how well our company's network is secured against cyberattacks.
- Developed a response web application using React.js, Material-UI and React Flow for dynamic data visualization.
- Created and implemented RESTful APIs with Node.js, ensuring seamless data flow and robust backend logic
- Integrated OpenSearch for efficient data querying and indexing, enabling fast and accurate search capabilities
- Utilized React Apexcharts and Recharts for interactive and insightful data visualizations
- Designed and implemented visually appealing and structured dashboard pages to enhance user experience. Focused on a clean and modern UI layout to improve accessibility
- Worked closely with backend developers, designers, and product managers to align dashboard functionality with project goals. Participated in discussions to provide insights and improve UI/UX design decisions.
- Performed thorough testing across all dashboard features to ensure smooth functionality and user experience. Verified data accuracy, component behavior, and responsiveness across different devices and screen sizes.
